MUHAMMED NAS P

PYTHON FULL STACK DEVELOPER

muhammednas.sunrise@gmail.com +91 8281850967 Ernakulam, Kerala Linked-in

PROFESSIONAL SUMMARY

Python Full Stack Developer Intern at Foximize Technologies, contributing to the development of web applications, backend functionality, responsive interfaces, and database integration. Familiar with Python, Django, MySQL, HTML, CSS, and JavaScript. Experience includes RESTful API integration, version control, debugging, and collaborative development. Also has internship experience in Data Science with Python and project experience developing EcoFlip, an AI-powered waste management application.

TECHNICAL SKILLS

Programming Languages: Python, C, C++
Backend Development: Django
Frontend Development: HTML, CSS, JavaScript
Databases: MySQL
Tools and Practices: Git, Debugging, Testing

PROFESSIONAL EXPERIENCE

Foximize Technologies 2026 – Present
Python Full Stack Developer Intern Kochi, India

- Assist in developing and maintaining full-stack web applications using Python and modern web technologies.
- Contribute to backend APIs and application functionality using Python frameworks, including Django.
- Develop responsive user interfaces using HTML, CSS, JavaScript, and frontend technologies.
- Work with relational databases, including MySQL and PostgreSQL, for data storage and retrieval.
- Collaborate with team members using Git for version control and participate in debugging, testing, and code reviews.
- Participate in Agile development activities and application improvement tasks.

I Net Infotech May 2025 – June 2025
Data Science with Python Intern Kochi, India

- Performed data cleaning, preprocessing, and exploratory data analysis using Python, Pandas, and NumPy.
- Created data visualizations using Matplotlib and Seaborn to explore dataset patterns.
- Explored fundamental machine learning concepts and applied basic models to datasets.

PROJECTS

EcoFlip – AI-Powered Waste Management System

- Developed a web application for sustainable waste disposal using waste image classification, pickup scheduling, and reward-based recycling.
- Integrated an AI model to classify waste images and help users identify waste categories.
- Designed separate User, Driver, and Admin modules for waste collection and platform management.
- Built the application using React.js, Node.js, Express.js, MongoDB, and Python, integrating RESTful APIs between the frontend, backend, and AI model.
- Included user authentication, booking management, and an e-commerce platform for recycled products.

EDUCATION

Bachelor of Computer Applications (BCA) 2023 – 2026
Sunrise College of Advanced Studies, Kannur

Higher Secondary Education – Science 2021 – 2023
Kerala Board of Higher Secondary Education, Kannur

CERTIFICATION

Data Science with Python – I Net Infotech
